## INTRODUCING THE NEW ISEKI SF237 OUT-FRONT MOWER COLLECTOR.

This model acts as the superseding model to the popular SF235 mower, offered with a powerful Stage V compliant 35 horsepower diesel engine. The SF range of out-front mowers are renowned for their flexibility and superior build quality, designed with a clear understanding of what commercial users want. With a choice of cutting decks measuring 54" or 60" wide, these high performance out-front mower-collectors are designed to facilitate grass cutting in the most difficult areas. Routine servicing and maintenance is refreshingly easy with excellent access to the engine, radiator and service points.
